

Appendix B — Class / Student Informed Consent

HR SJT — Class / Student Informed Consent (IRB review copy)

IRB review copy — MNGT 425 class / student secondary-data consent. Use this document if a prior link failed. Live interactive page (note the /hsirb/ prefix): <https://bayoupal.nicholls.edu/hsirb/studies/hr-sjt/student-data-consent/>

Link note for reviewers: URLs without /hsirb/ (for example .../studies/hr-sjt/student-data-consent/) return 404. Always use the /hsirb/studies/... path above, or this static document.

Informed Consent for Participation in Research

Project Title: HR Situational Judgment Test: Evidence-Based HR Decision-Making

Principal Investigator: Dr. Christopher Castille, Management and Marketing

Separate consent form for MNGT 425 students only — secondary use of existing course assignment data.

1. Introduction and Purpose

You are being asked to participate in a research study comparing how students and HR professionals evaluate specific workplace tactics. You were selected because you completed the case study exercises in MNGT 425 HR Analytics. Research participation (allowing your course data to be used for this study) is VOLUNTARY. You must be 18 years of age or older.

2. Procedures

If you agree to participate, you grant the researcher permission to include your previously submitted case study ratings in a research dataset.

No New Work: You do not need to complete any new assignments or surveys.

Data Extraction: Only the numerical ratings and categorical responses from your LMS submission will be used. Your written reflections or personal identifiers will be removed during the analysis phase.

3. Potential Benefits

Contributing to research on HR education and how student ratings compare with professional ratings.

As a token of appreciation, you may receive an aggregated infographic comparing perspectives (no individuals identified).

There is no monetary payment for this secondary-data consent.

4. Potential Risks

This study involves minimal risk. Possible risks include:

Minimal privacy risk associated with secondary use of course ratings; the research dataset is coded and de-identified.

No new tasks are required; there is no additional time burden beyond reading this form.

Risks are no greater than those of ordinary educational records review. You may withdraw or request deletion at any time without penalty.

5. Confidentiality

Your privacy is our priority.

While the researcher (your instructor) has access to your original submission for grading purposes, the research dataset will be coded. Your name and student ID will be replaced with a candidate ID (a unique code linking only to you for the purpose of withdrawal and deletion requests). This allows you to request that your records be deleted at any time.

No identifiable information will be included in any publications, presentations, or shared with the participating managers.

6. Voluntary Participation and “Grade Shield”

Your participation is completely voluntary.

No Penalty: Your decision to participate, or not to participate, will have zero impact on your grade in MNGT 425 or your relationship with the instructor.

Blinded Access: To ensure there is no bias, the instructor will not access the list of consenting students until after the final semester grades have been submitted to the Registrar.

7. Right to Withdraw

You may withdraw your consent at any time without penalty by contacting the Department of Management and Marketing / Dr. Christopher Castille at christopher.castille@nicholls.edu.

8. Right to Deletion

You may request that your data be deleted at any time without penalty. Because your record is linked to a candidate ID, the researcher can locate and remove your data from the research dataset. There are no penalties or consequences for requesting deletion.

9. Consent

I have been informed about the procedures described above and the potential risks and benefits of the research project. I have had the opportunity to ask questions about the research procedures which have been explained to me. I understand that this project and this consent form have been approved by the Nicholls State University, Human Subjects Institutional Review Board which ensures that research projects follow Nicholls State University policies and procedures and comply with federal guidelines. I have been informed that any modifications of the experimental protocol which might affect my consent or willingness to participate will be provided to me. Finally, I have been provided an opportunity to be informed of the results of this study once it has been completed.

By selecting "I Agree," you confirm that you are at least 18 years of age, have read this form, understand the study, voluntarily agree to let your course assignment data be used for this research, and understand you may request deletion at any time without penalty.

Static IRB review copy for the class/student consent. Contact: Dr. Christopher Castille — christopher.castille@nicholls.edu — 985-449-7015.
